

Keep your home and garden green and our water clean.

Work with nature — keep a clean home and a healthy garden to prevent pests.

If you use pesticides please remember:

- **BUY** the right pesticide to do the job, and buy only what you need to keep pests under control
- **USE** all products according to the directions
- **DISPOSE** of pesticides properly. Don't dump down the drain — that harms water quality

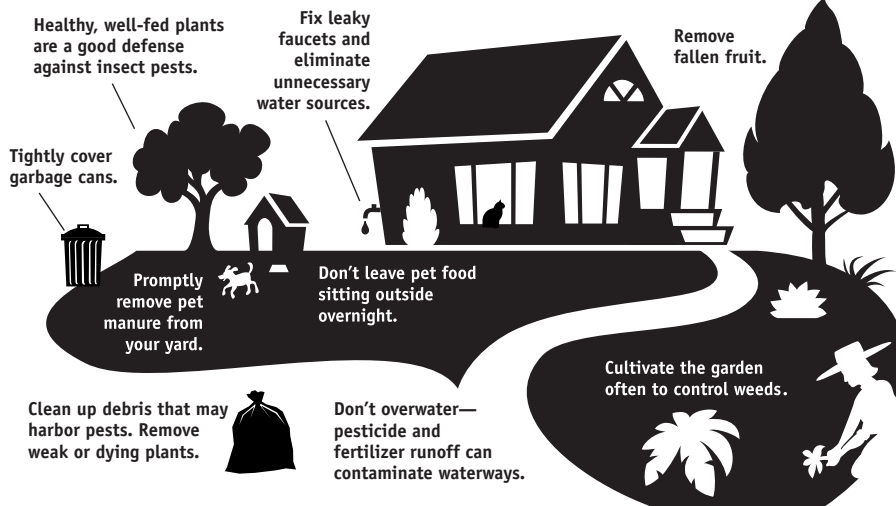

For more information, please contact:

California Environmental Protection Agency
Department of Pesticide Regulation
